Resuscitation, 19 (1990) 323—325
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 19 (1990)

absorption of endotracheal drugs, absorption of endotracheal lidocaine, blood lidocaine levels, endotracheal drug therapy, endotracheal lidocaine, hypovolemic shock, plasma levels of endotracheal drugs, 291
absorption of endotracheal lidocaine, absorption of endotracheal drugs, blood lidocaine levels, endotracheal drug therapy, endotracheal lidocaine, hypovolemic shock, plasma levels of endotracheal drugs, 291
adrenergic agonists, cardiac arrest, catecholamines, 1
adult respiratory distress syndrome, trauma, shock, traumatic shock, disseminated intravascular coagulation, plasminogen, plasminogen activator, 61
airway obstruction, heart arrest, mediastinal neoplasms, 175
anaerobic glycolysis, cardiac arrest and resuscitation, lactate, neurologic function, cerebral ischemia, brain biopsy, 271

blood lidocaine levels, absorption of endotracheal drugs, absorption of endotracheal lidocaine, endotracheal drug therapy, endotracheal lidocaine, hypovolemic shock, plasma levels of endotracheal drugs, 291
brain, cerebral blood flow and oxygen consumption, response to $Paco_2$, coma, hepatic and septic encephalopathy, 125
brainstem auditory evoked potentials, cardiac arrest, deferoxamine, electroencephalogram, free radicals, superoxide dismutase, 25
brain biopsy, cardiac arrest and resuscitation, lactate, neurologic function, cerebral ischemia, anaerobic glycolysis, 271

calcium, magnesium, conscious, Irreversible shock, fixed-volume hemorrhage, serum enzymes, dogs, 41
cardiac arrest, adrenergic agonists, catecholamines, 1
cardiac arrest, brainstem auditory evoked potentials, deferoxamine, electroencephalogram, free radicals, superoxide dismutase, 25
cardiac arrest, dye circulation times, end tidal CO_2, CPR, 53
cardiac arrest, epinephrine, resuscitation, epinephrine administration, intravenous, 241
cardiac arrest, resuscitation, prehospital, 143
cardiac arrest, resuscitation, ventricular fibrillation, 167
cardiac arrest and resuscitation, lactate, neurologic function, cerebral ischemia, anaerobic glycolysis, brain biopsy, 271
cardiac massage, cardiac output, CBF, 115
cardiopulmonary resuscitation, catecholamines, epinephrine, norepinephrine, regional blood flow, ventricular fibrillation, 227
cardiopulmonary resuscitation, evaluation, 135
cardiac output, cardiac massage, CBF, 115
catecholamines, cardiac arrest, adrenergic agonists, 1
catecholamines, epinephrine, cardiopulmonary resuscitation, norepinephrine, regional blood flow, ventricular fibrillation, 227
CBF, cardiac massage, cardiac output, 115
cerebral blood flow and oxygen consumption, brain, response to $Paco_2$, coma, hepatic and septic encephalopathy, 125
cerebral ischemia, cardiac arrest and resuscitation, lactate, neurologic function, anaerobic glycolysis, brain biopsy, 271
coma, brain, cerebral blood flow and oxygen consumption, response to $Paco_2$, hepatic and septic encephalopathy, 125
conscious, Irreversible shock, calcium, magnesium, fixed-volume hemorrhage, serum enzymes, dogs, 41
CPR, dye circulation times, end tidal CO_2, cardiac arrest, 53
CPR, insulin, epinephrine, heart muscle, 17

deferoxamine, brainstem auditory evoked potentials, cardiac arrest, electroencephalogram, free radicals, superoxide dismutase, 25
disseminated intravascular coagulation, trauma, shock, traumatic shock, adult respiratory distress syndrome, plasminogen, plasminogen activator, 61

dogs, calcium, magnesium, conscious, Irreversible shock, fixed-volume hemorrhage, serum enzymes, 41
dye circulation times, end tidal CO_2, cardiac arrest, CPR, 53

electroencephalogram, brainstem auditory evoked potentials, cardiac arrest, deferoxamine, free radicals, superoxide dismutase, 25
endotheliocytes, hypovolemic shock, ischemic edema of the brain, membranes of nervous cell ultrastructures, 89
endotracheal, intraosseous, epinephrine, intravenous, 103
endotracheal drug therapy, absorption of endotracheal drugs, absorption of endotracheal lidocaine, blood lidocaine levels, endotracheal lidocaine, hypovolemic shock, plasma levels of endotracheal drugs, 291
endotracheal lidocaine, absorption of endotracheal drugs, absorption of endotracheal lidocaine, blood lidocaine levels, endotracheal drug therapy, hypovolemic shock, plasma levels of endotracheal drugs, 291
end tidal CO_2, dye circulation times, cardiac arrest, CPR, 53
enflurane, hemorrhagic shock, inhalation anesthetics, halothane, isoflurane, myocardial metabolism, 159
epinephrine, cardiac arrest, resuscitation, epinephrine administration, intravenous, 241
epinephrine, catecholamines, cardiopulmonary resuscitation, norepinephrine, regional blood flow, ventricular fibrillation, 227
epinephrine, endotracheal, intraosseous, intravenous, 103
epinephrine, insulin, heart muscle, CPR, 17
epinephrine administration, epinephrine, cardiac arrest, resuscitation, intravenous, 241
evaluation, cardiopulmonary resuscitation, 135

fixed-volume hemorrhage, calcium, magnesium, conscious, Irreversible shock, serum enzymes, dogs, 41
free radicals, brainstem auditory evoked potentials, cardiac arrest, deferoxamine, electroencephalogram, superoxide dismutase, 25

halothane, hemorrhagic shock, inhalation anesthetics, enflurane, isoflurane, myocardial metabolism, 159
hazard, resuscitation, safety, infection, 151
heart arrest, airway obstruction, mediastinal neoplasms, 175
heart muscle, insulin, epinephrine, CPR, 17
hemorrhagic shock, inhalation anesthetics, halothane, enflurane, isoflurane, myocardial metabolism, 159
hepatic and septic encephalopathy, brain, cerebral blood flow and oxygen consumption, response to $PaCO_2$, coma, 125
hypertonic saline, sodium bicarbonate, tromethamine, respiratory acidosis, 253
hypovolemic shock, absorption of endotracheal drugs, absorption of endotracheal lidocaine, blood lidocaine levels, endotracheal drug therapy, endotracheal lidocaine, plasma levels of endotracheal drugs, 291
hypovolemic shock, ischemic edema of the brain, endotheliocytes, membranes of nervous cell ultrastructures, 89

infection, resuscitation, safety, hazard, 151
inhalation anesthetics, hemorrhagic shock, halothane, enflurane, isoflurane, myocardial metabolism, 159
insulin, epinephrine, heart muscle, CPR, 17
intraosseous, endotracheal, epinephrine, intravenous, 103
intravenous, endotracheal, intraosseous, epinephrine, 103
intravenous, epinephrine, cardiac arrest, resuscitation, epinephrine administration, 241
ischemic edema of the brain, hypovolemic shock, endotheliocytes, membranes of nervous cell ultrastructures, 89
isoflurane, hemorrhagic shock, inhalation anesthetics, halothane, enflurane, myocardial metabolism, 159

lactate, cardiac arrest and resuscitation, neurologic function, cerebral ischemia, anaerobic glycolysis, brain biopsy, 271

magnesium, calcium, conscious, Irreversible shock, fixed-volume hemorrhage, serum enzymes, dogs, 41
mediastinal neoplasms, airway obstruction, heart arrest, 175
membranes of nervous cell ultrastructures, hypovolemic shock, ischemic edema of the brain, endotheliocytes, 89
myocardial high energy phosphate, ventricular fibrillation, total circulatory arrest, 199
myocardial metabolism, hemorrhagic shock, inhalation anesthetics, halothane, enflurane, isoflurane, 159

neurologic function, cardiac arrest and

resuscitation, lactate, cerebral ischemia, anaerobic glycolysis, brain biopsy, 271
norepinephrine, catecholamines, epinephrine, cardiopulmonary resuscitation, regional blood flow, ventricular fibrillation, 227

plasma levels of endotracheal drugs, absorption of endotracheal drugs, absorption of endotracheal lidocaine, blood lidocaine levels, endotracheal drug therapy, endotracheal lidocaine, hypovolemic shock, 291
plasminogen, trauma, shock, traumatic shock, adult respiratory distress syndrome, disseminated intravascular coagulation, plasminogen activator, 61
plasminogen activator, trauma shock, traumatic shock, adult respiratory distress syndrome, disseminated intravascular coagulation, plasminogen, 61
prehospital, resuscitation, cardiac arrest, 143

regional blood flow, catecholamines, epinephrine, cardiopulmonary resuscitation, norepinephrine, ventricular fibrillation, 227
respiratory acidosis, sodium bicarbonate, hypertonic saline, tromethamine, 253
response to $Paco_2$, brain, cerebral blood flow and oxygen consumption, coma, hepatic and septic encephalopathy, 125
resuscitation, cardiac arrest, ventricular fibrillation, 167
resuscitation, epinephrine, cardiac arrest, epinephrine administration, intravenous, 241
resuscitation, prehospital, cardiac arrest, 143
resuscitation, safety, infection, hazard, 151

safety, resuscitation, infection, hazard, 151
serum enzymes, calcium, magnesium, conscious, Irreversible shock, fixed-volume hemorrhage, dogs, 41
sodium bicarbonate, hypertonic saline, tromethamine, respiratory acidosis, 253
superoxide dismutase, brainstem auditory evoked potentials, cardiac arrest, deferoxamine, electroencephalogram, free radicals, 25

total circulatory arrest, myocardial high energy phosphate, ventricular fibrillation, 199
traumatic shock, trauma, shock, adult respiratory distress syndrome, disseminated intravascular coagulation, plasminogen, plasminogen activator, 61
trauma, shock, traumatic shock, adult respiratory distress syndrome, disseminated intravascular coagulation, plasminogen, plasminogen activator, 61
tromethamine, sodium bicarbonate, hypertonic saline, respiratory acidosis, 253

ventricular fibrillation, cardiac arrest, resuscitation, 167
ventricular fibrillation, catecholamines, epinephrine, cardiopulmonary resuscitation, norepinephrine, regional blood flow, 227
ventricular fibrillation, myocardial high energy phosphate, total circulatory arrest, 199

Resuscitation, 19 (1990) 327
